

14. Restore Backup File

<Abstract>

A screen to return the table status to the one when the backup file was created based on the SQL file created in the backup screen.

<Screen Image>

<Notes>

- It doesn't use for setup the eAWC because the eAWC setup tool has a backup restoration function.

<Procedure>

1. Restore a backup file.

- (1) Press [Start] button.
 - Data in the backup file is reflected to the table.
